ABOUT THE PROGRAMME

During the Technological Change and Sustainability Workshop participants will analyse critical challenges that technology may face, including:

- Privacy
- Data management
- Risks to cybersecurity
- E-waste

The workshop will also address the widening of social divides to provide a well-rounded approach.

Ultimately, this workshop examines the process in which stakeholders tackle issues that may arise in a hyper-digitised world. The programme is developed by The London Institute of Banking & Finance and is delivered in partnership with ADGM Academy.

Participants will gain the below learning outcomes:

-  Explain the impact of new technology on sustainable development opportunities
-  Explain how big data can be used and deployed by banks and investors
